Foreword

This year's edition of the Deloitte Touche Tohmatsu Limited (DTTL) Global Technology, Media & Telecommunications (TMT) Industry Group's annual Technology Fast 500 Asia Pacific Ranking—now in its twelfth year—reveals some striking trends that signify new promise and suggest new directions for the future of the region's TMT businesses. For one thing, it is clear that the best of these—like the top five in this year's ranking with their average 10,589 percent three-year growth rate and predominance of Internet firms—can outperform, even in the most mature and stable of markets.

On the other hand, the pullback of growth among the majority of Asia Pacific's fastest-growing 500 technology companies—determined by three-year historic revenue performance for both publicly listed and privately held businesses—to just 355.74 percent, suggests that the fundamental quality of a business, rather than the underlying macroeconomic upsurge, is becoming ever more important in achieving outstanding performance.

This is the kind of cross-border and multi-sector development that the global DTTL TMT Industry Group is especially well equipped to track. Our wide regional reach allows us to observe the trends and capture the data across nine Asia Pacific locations: Australia; China (including Hong Kong); India; Japan; South Korea; Malaysia; New Zealand; Singapore and Taiwan, where we monitor the fast-growing TMT businesses that comprise the Technology Fast 500 Asia Pacific 2013 Ranking.

The changing pattern of regional contributions to that growth—especially from China—suggests that changes are afoot in the regional TMT landscape that could make a big difference to the industry in the years to come, in terms of both industry fundamentals and demand. For instance, developed markets are making a big comeback: this year, Australia contributed 66 companies to the top 500, its third year of consecutive growth. And Japan, joint fifth with New Zealand at 40 companies in the top 500, was the only primarily national market to feature twice in the top five, with Internet companies Locondo and Donuts. Also, China and India are challenging Taiwan's traditional lead as the reservoir of Asia Pacific's fastest-

growing TMT companies, coming first and third this year in terms of the number of companies each has contributed to the top 500—128 and 78 companies respectively—while Taiwan slips into second place with 108.

The importance of cross-border ties is emphasised by this year's outright winner, Taiwan's China Communications Media Group (CCMG), with its outstanding three-year growth rate of 26,585%. While based in Taiwan, like last year's winner ProCrystal Technology, CCMG addresses a user base of over 100 million people across Greater China via mobile Internet. Technically a software company, CCMG has capitalized on the geographical and sectoral growth potential of mobile communications to deliver that remarkable growth result, particularly through channel extension services that position it as a conduit for providers seeking to reach this vast audience.

This year, we also welcome as our sponsor UK Trade & Investment, which works with Asia-based businesses to secure their success in international markets like the UK. The contribution of such agencies, whether from within the region or helping businesses to reach beyond it, provides further growth drivers for the cross-border expansion and dynamic development of these significant TMT companies.

This is the kind of impetus that has lifted the top echelon of this year's Asia Pacific Technology Fast 500 so far above the growth range of previous years and the common run of companies. We look forward to seeing more of the same from the region's TMT sector, in the future.

Jolyon Barker

DTTL Managing Director
Global Technology,
Media & Telecommunications

Ichiro Nakayama

DTTL Leader
Technology Fast 500 Asia Pacific

Deloitte TMT practices overview

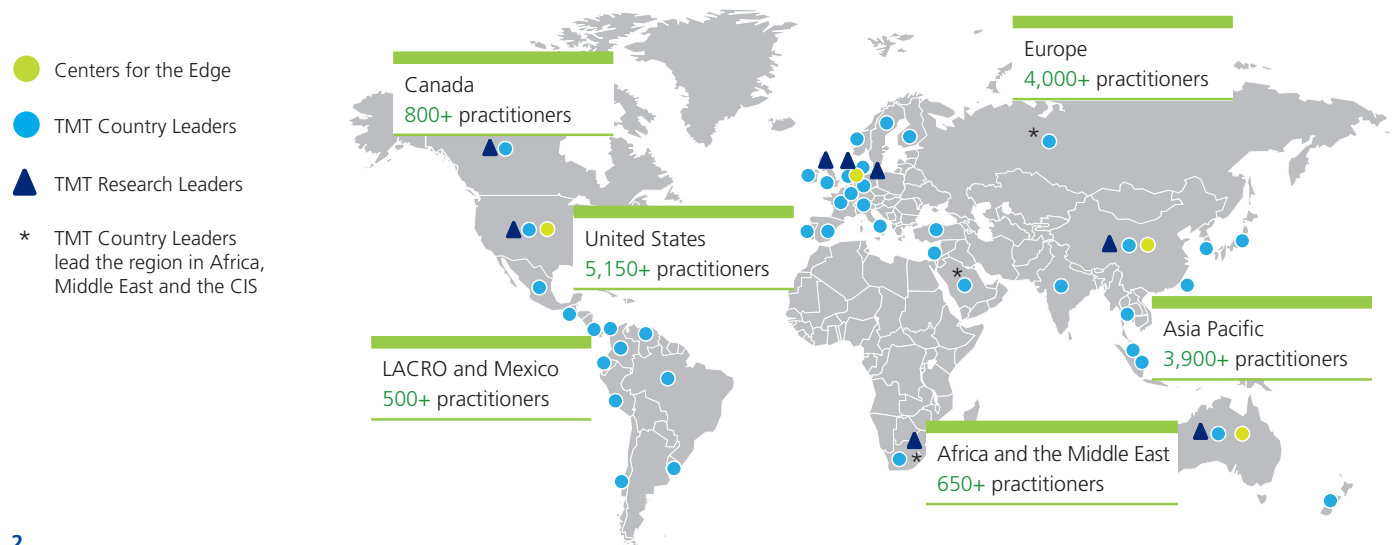

Deloitte TMT practices serve clients that are geographically and functionally diverse, with the aim of delivering consistently excellent services wherever and whenever they are needed. Leveraging the power of Deloitte's global network, the practices aim to bring the right team and specialists to each task, developing and delivering valuable thought leadership and sharing best practice. The development of world-class business leaders and industry specialists is an investment that pays dividends, both in terms of career development and best business practice. Deloitte TMT practices aim to provide unmatched levels of service and insight across the value chain.

TMT clients

Companies in the TMT sector confront a swiftly changing marketplace and Deloitte member firms' TMT practices are helping companies adapt quickly, with extensive services across the following areas:

- Ninety-three percent of the TMT companies in the 2012 *Fortune* Global 500®
- Nineteen of the 23 largest technology companies.
- All nine of the largest global media companies.
- All 23 of the largest telecommunications companies.

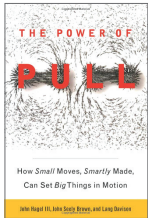

Deloitte has over 15,000 TMT professionals worldwide

Center for the Edge

Deloitte's Centers for the Edge in Australia, China, Netherlands and the United States help senior executives make sense of, and profit from, emerging opportunities on the edge of business and technology. What is created on the edge of the competitive landscape—in terms of technology, geography, demographics and

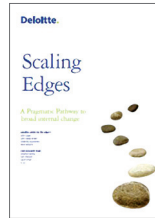

markets—inevitably strikes at the very heart of a business. Our Centers for the Edge add value to an organization by enhancing recognition of industry-sector leadership, improving client and target relationships, influencing wins and creating new opportunities—all critical to delivering the 'Deloitte Client Experience.'

The Power of Pull

The future of exchanging value

Scaling Edges

Chinese Mobile Device Investment

China Mobile Payment Industry Trends 2012-2015

Major industry events

International Consumer Electronics Show (CES)

Deloitte TMT practices continue to have a significant presence at CES, offering tours of the exhibition floor to clients and moderating a number of panels. Deloitte is a titled sponsor of the 2014 Leaders in Technology Dinner at CES, which is expected to attract roughly 500 of the most influential industry leaders.

Mobile World Congress (MWC)

Deloitte telecommunications leaders from around the world met the most influential telecom service providers and handset developers at the Mobile World Congress in Barcelona. Tailored tours of the exhibition floor were offered, highlighting the most important and innovative technologies, and Deloitte specialists moderated a successful panel entitled 'Back to the Future: Mobile Innovation 2023'.

International Broadcasting Conference (IBC)

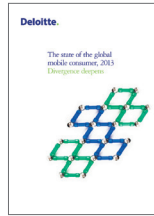

Deloitte's Media & Entertainment practices were delighted to collaborate with the IBC Leaders' Summit for the third consecutive year. A Deloitte report, 'Survival of the fast: TV's evolution in a connected world', was the focus of discussion at this exclusive invitation-only event.

TMT thought leadership

A good idea can propel an organization to greatness and catalyse profound change. Deloitte is committed to helping clients generate new ideas to solve their most difficult challenges and create lasting value. Along the way, Deloitte professionals are not afraid to make bold assertions and have difficult conversations. Deloitte produces a variety of thought leadership and other materials focusing on the most important strategic trends in global business.

A message from Lord Green

I am delighted to support the Deloitte Technology Fast 500 program in Asia Pacific. Today's innovative firms from Asia are the UK's business partners of tomorrow.

The UK offers the complete package for technology entrepreneurs to imagine, start and grow a business. London's Tech City is home to Europe's largest technology cluster, while other vibrant centres such as Manchester, Birmingham, Bristol, Liverpool and Leeds offer opportunities for companies operating at the cutting edge of software; advanced engineering and materials; telecoms; and life sciences industries.

We have introduced one of the world's most ambitious packages of benefits for fast-growing, entrepreneurial firms. Firms can benefit from business incentives, targeted business support, tax credits, tax reductions and specialist visas. For example, the government recently introduced the Patent Box scheme, which lowers corporation tax to ten percent on profits from the development and exploitation of

patents. This complements existing tax breaks offered through R&D tax credits and the Entrepreneurs' Relief scheme.

Support is not just financial. Across the UK, we have harnessed the power of technology firms, entrepreneur networks, financiers, venture capitalists and large technology companies to create supportive ecosystems for fast-growing firms.

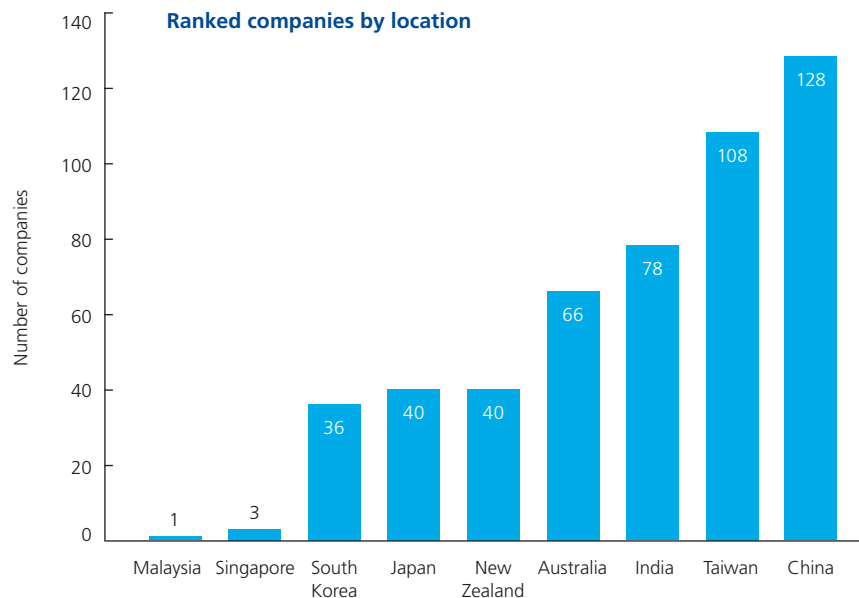

I would encourage Deloitte Fast 500 companies to consider expanding into the UK to join the 600 firms now in London's Tech City, or the other 1,000 international ICT companies who have set up in the UK in the last three years.

Stephen Green
Minister of State for Trade and Investment

Ranked company fast facts

By location

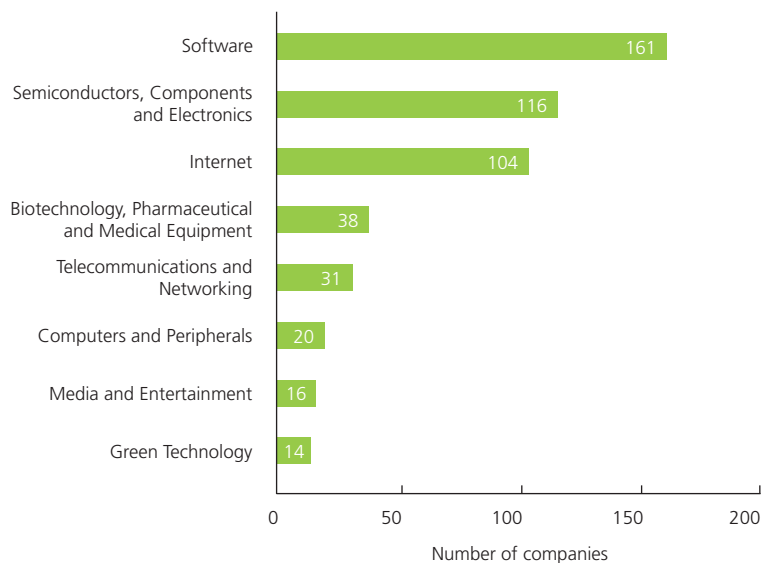

China forged ahead of 2012 winner Taiwan this year, with 128 companies in the Fast 500, well up on its 2012 total of 103.

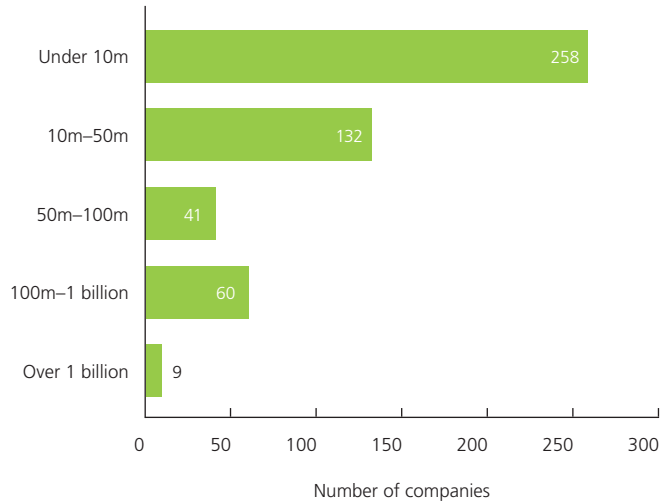

By industry sector

Software was this year's leading sector, swapping places with 2012 first placer Semiconductors, Components and Electronics. With a pronounced lead of 161 companies, up from 119 in 2012, the Software sector contributed almost one third of the entire Asia Pacific Technology Fast 500. In the year of the Twitter IPO, the Internet sector came third.

Ranked companies by industry sector

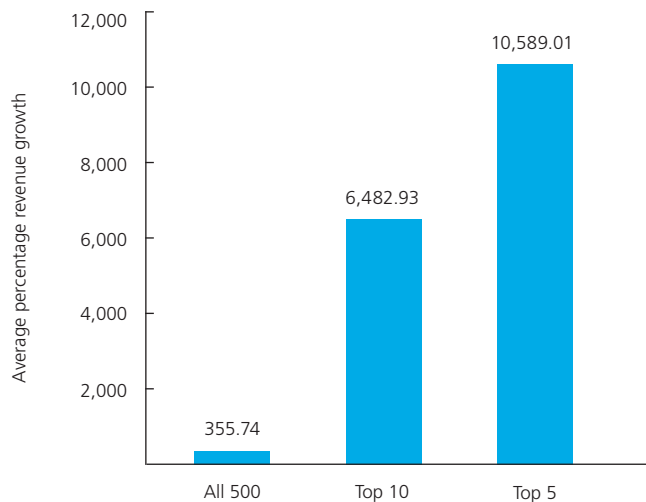

Final-year revenue (USD)

By final-year revenue

Final-year revenue numbers saw a pullback at the USD1 billion+ end of the ranking, from 14 in 2012 to nine in 2013. However, companies at the opposite end of the spectrum, with final-year revenue under USD10 million, showed a big upsurge from 177 in 2012 to 258 in 2013.

Average revenue growth

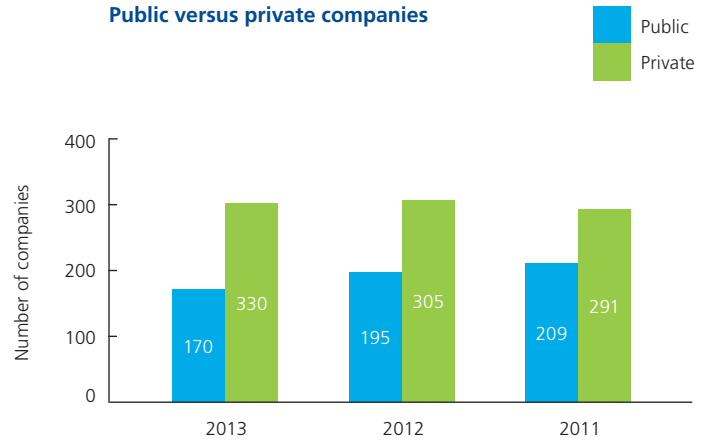

By revenue growth

The top five fastest-growing companies exceeded even last year's 10,338 percent growth, with over 10,589 percent. The average top 500 growth, however, was less outstanding at 355.74 percent versus the 2012 growth figure of 467 percent.

Public or private

The public versus private balance in 2013 continued its shift towards privately held companies—evident over the past three years—with private businesses now contributing 330 of the 2013 total and listed companies only one third. This was perhaps more surprising given that this year's fastest-growing business, Taiwan's China Communication Media Group, is publicly listed.

Public versus private companies

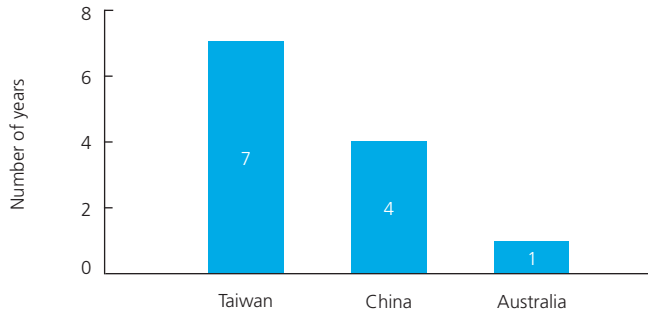

Top 20 ranked companies

In 2013, India stole China's crown as home to the most top 20 companies in the ranking. This year, five of the top 20 firms come from India, while four come from both Japan and Australia. Only two are from China this year, down from seven in 2012.

Number of Top 20 companies in 2013	
India	5
Japan	4
Australia	4
Taiwan	3
China	2
South Korea	1
New Zealand	1

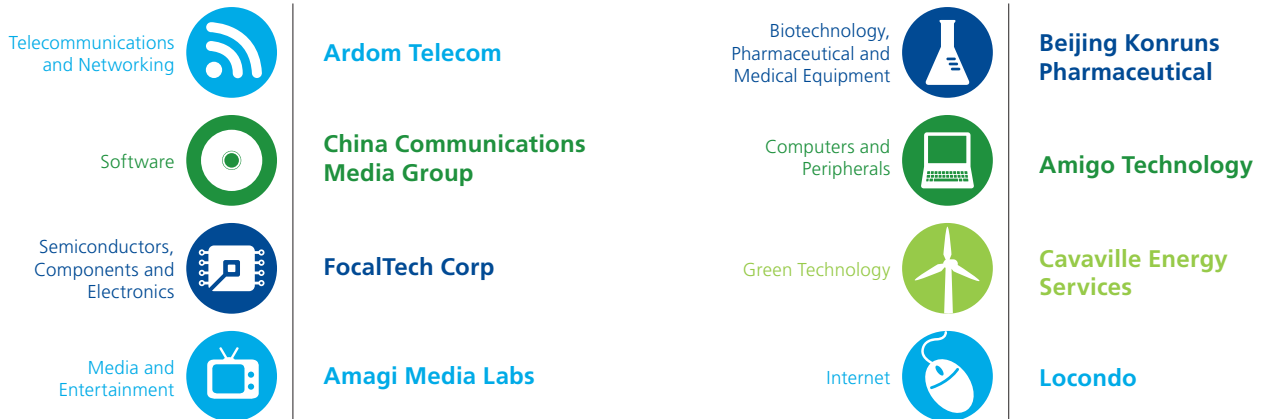

Number of overall winners in the last 12 years

Overall winners from 2002–2013

Taiwan, although second place in its overall share of this year's Asia Pacific Technology Fast 500 with 108 companies, has been the single biggest contributor to the Technology Fast 500 Ranking over the last decade, providing the region's fastest-growing TMT company in seven of those 12 years. This is testament to the power and intellectual capital of Taiwan's technology cluster, as well as to the value of the Greater China market, so proximate and easily addressable, as a growth engine. This year's winner China Communications Media Group, with its 26,585% three-year growth rate, is just one example.

Industry sector winners in 2013

Innovation through customer focus:

Interview with the winner, Lin Weijun, CEO of China Communications Media

DTTL TMT: What one word would you use to describe your company culture?

Innovation. CCMG is in a fast-changing and very competitive industry. It needs to be very innovative to adapt to the environment.

DTTL TMT: Has your growth over the last three years been organic or inorganic?

Over the last three years, CCMG has generated its fast growth internally. However, CCMG does not rule out acquiring other companies, so long as those companies can help to: (a) create competitive barriers to entry, (b) deliver high value to the bottom line and (c) deliver synergy with CCMG's existing business.

DTTL TMT: What has been the main driver of your remarkable growth and success, and how will you maintain this?

CCMG has benefited from the fast proliferation of smartphones, higher wireless Internet speeds and the exponential growth of wireless applications. Wireless Internet is still in its infancy and we have only seen the opening stages of the wireless revolution. Social networking, location-based services, personalized applications and wireless e-commerce have supplied the momentum for our success. CCMG's ability to control the application delivery channels will ensure our future success.

Up close and personal

Albert Lin Weijun has more than 30 years of experience in the telecoms, Internet and wireless industries, as well as in venture capital investment. Prior to becoming the Chairman of China Communication Media Group (CCMG), Lin held leadership positions in both multinational and start-up companies, including CEO of China.com, CEO of Lingtu, VP with Motorola and COO of Newpalm. Lin also has extensive experience in wireless Internet through venture capital investment and has helped create the framework for the handset business.

DTTL TMT: How are you addressing the current disruption taking place in the market, and staying ahead of your competitors?

No one can predict which disruptive technologies or killer applications will become the next Google or Facebook. One way to stay ahead of the curve is to ignore the current boundaries and focus on customers. User experience is key for our industry and CCMG needs to use big data to capture the needs of our users and offer services to our customers before they even realize their own needs.

DTTL TMT: What is the greatest challenge the company faces, currently?

CCMG has focused its business solely on the PRC, as China provides a large user base for us to grow. However, CCMG needs to look beyond China to enter other markets. Expanding internationally is CCMG's next great challenge.

DTTL TMT: Has innovation played a big role in your company's success? And what percentage of spend do you allocate to R&D?

Innovation is absolutely key to our success. Unlike traditional product-focused companies, CCMG has not spent a lot of money on R&D. Instead, we have focused our investment on user experience, big-data analysis and capturing user behavior.

DTTL TMT: Are you confident of continued growth through 2014?

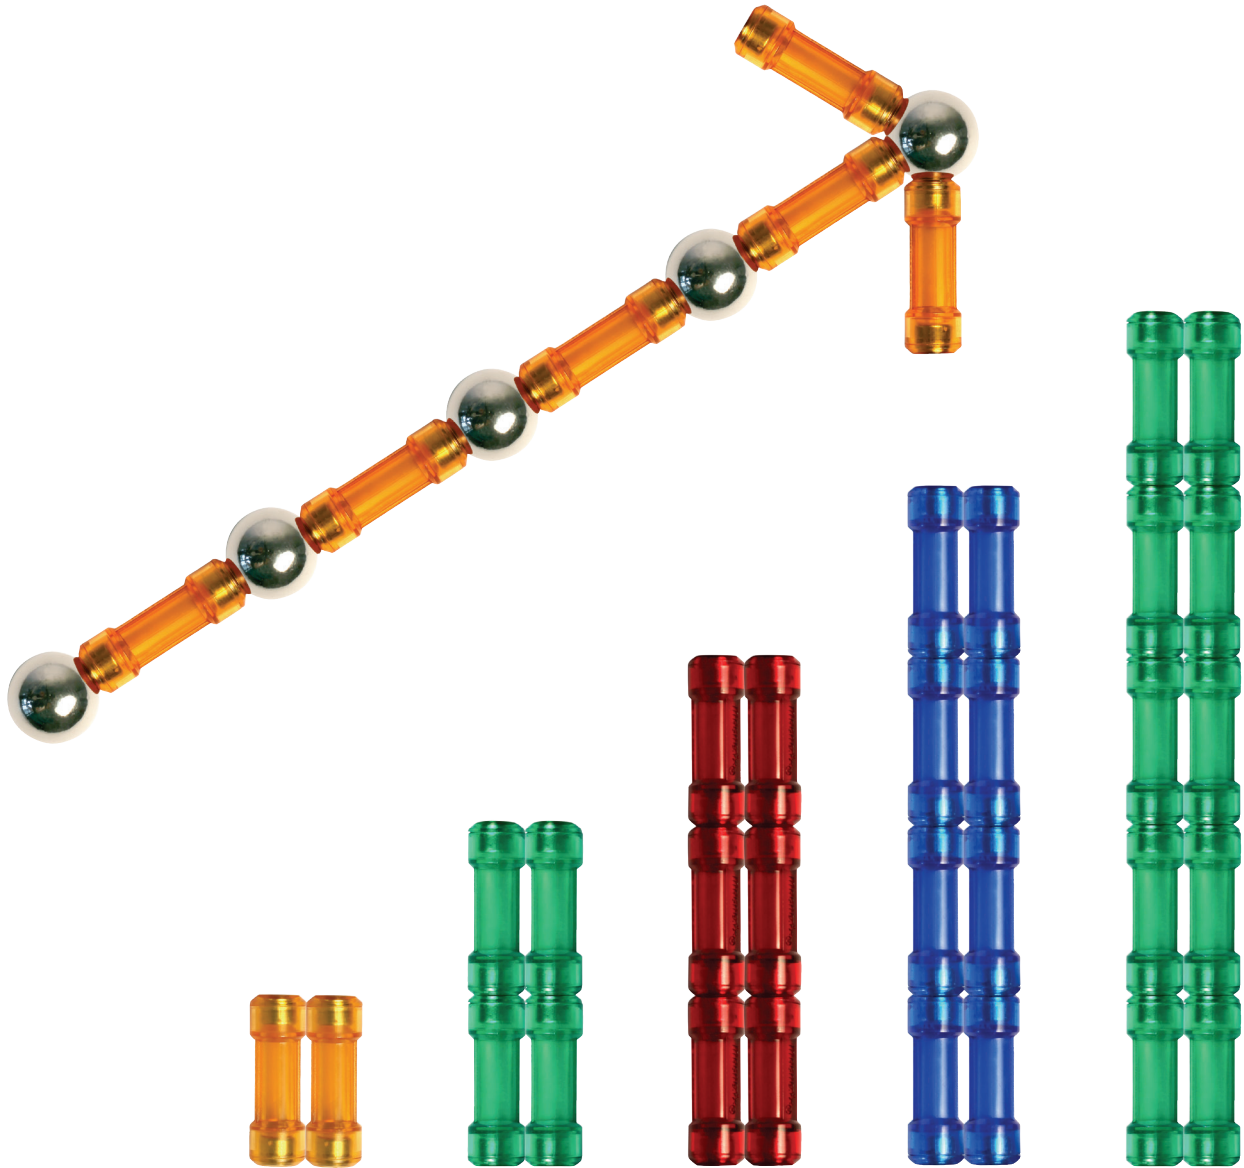

We believe CCMG can sustain its current growth trend through 2014 and beyond. The impending launch of 4G will provide us with great opportunities to offer our customers better applications and better user experience.

DTTL TMT: Which company achievement are you most proud of, to date?

CCMG has been able to position itself as one of the leaders in wireless applications and service delivery channels. We were able to foresee the evolution of wireless Internet and take advantage of being an early mover in that space.

Resurgence and resilience: The top five companies

This year's top five companies showcase both the comeback in growth and performance of technology companies since previous years, and the gains that can still be won even in the region's most mature and advanced markets. This year, two of the top five companies come from the most mature market in Asia Pacific, Japan, while only one hails from the emerging market of India. And after 2012's average three-year revenue growth rate of 6,837 percent, this year, the top five achieved 10,589 percent.

The top five in 2013 also demonstrate the importance of the Internet as a growth engine—hardly surprising in the year of the Twitter IPO. This year's fastest-growing company, Taiwan's China Communication Media Group with a growth rate of 26,585 percent—more than twice that of last year's winner, Taiwan's ProCrystal Technology—is a mobile phone software company. But that niche also depends on the Internet, and the success of Locondo and Donuts in Japan, as well as Plan B Logistics in Australia, show what performance can be won from consumer and business Internet propositions, alike.

Top five companies at a glance

- Two from Japan, one each from Taiwan, India and Australia
- Three-year average revenue growth of 10,589%
- Three Internet companies
- One Telecommunications and Networking company
- One Software company

1. China Communication Media Group

Sector	Software
Location	Taiwan
Three-year growth	26,585%
Founded	2011
CEO	Lin Weijun
Website	www.ccmg.mobi

China Communication Media Group (CCMG), one of China's largest mobile software platforms, develops and markets software for smartphones. The company focuses on applications for mobile phones which provide channel-extension services. In 2007, CCMG began to introduce value-added services, and in 2009 launched Symbian/Windows Mobile/Linux platforms and numerous cross-platform products, including MTK, Spreadtrum and Mstar. Today, CCMG serves more than 100 million mobile phone subscribers.

2. Ardom Telecom

Sector	Telecommunications and Networking
Location	India
Three-year growth	12,023%
Founded	2009
CEO	Ajit Shankar
Website	www.ardom.in

Ardom Telecom is focused on providing reliable operations and maintenance services for both active and passive components of cellular networks. The company focuses on addressing areas that raise costs and increase operating inefficiencies for telecommunication companies, resulting in Ardom becoming the partner of choice for leading telecom firms in India.

3. Locondo

Sector	Internet
Location	Japan
Three-year growth	6,643%
Founded	2010
CEO	Yusuke Tanaka
Website	www.locondo.co.jp

Locondo operates an e-commerce site specialising in shoes and bags. Since its launch in February 2001, Locondo has acquired more than 400,000 members and partnered with over 1,000 brands, providing customers with free shipping, free returns and free concierge. Recently, Locondo expanded its range to include clothing, watches and accessories.

4. Donuts

Sector	Internet
Location	Japan
Three-year growth	3,863%
Founded	2007
CEO	Hironari Nishimura
Website	www.donuts.ne.jp

Donuts is a mobile social game and social services provider. The company was founded in Japan in 2007 and has launched various mobile social games, for both standard mobile phones and smartphones. Donut has also launched a social community service that makes booking appointments between job-hunting students and corporate professionals, easier.

5. Plan B Logistics

Sector	Internet
Location	Australia
Three-year growth	3,832%
Founded	2008
CEO	Phillip Weinman
Website	www.planbgroup.com.au

Plan B is a travel-management platform and corporate booking tool, aiming to deliver cost savings, process-efficiency gains and corporate governance compliance. Plan B challenges the traditional, corporate travel-agency model, shifting the focus from the agency to the client. It purchases the best travel deals on the buyer's behalf, rather than act as a conventional sales agent selling for airlines and hotels.

Deloitte Technology Fast 500 Asia Pacific 2013 Ranking

The Deloitte Technology Fast 500 Asia Pacific Ranking measures and recognizes growth of the fastest-growing technology companies in the region. Five hundred companies are ranked according to revenue growth rates over the past three years.

How does the DTTL TMT Industry Group determine the winners?

The Deloitte Technology Fast 500 Asia Pacific 2013 winners consist of the 500 public and private technology, media and telecommunications companies headquartered in Asia Pacific, that have achieved the highest rates of revenue growth over the past three years. In order to be eligible for Technology Fast 500 recognition, companies must have base-year operating revenue of at least USD50,000.

The DTTL TMT Industry Group assumes that all information provided by each company is accurate and does not independently verify such information.

Given the outstanding performance of the top five companies in the 2013 ranking, with their 10,589 percent three-year growth rate, it's perhaps surprising that the average growth rate for the top 500 companies fell to 355.74 percent, well below the 2012 figure of 467 percent and even below the 2010 level of 374 percent.

Software, last year's second fastest-growing sector with 119 companies in the top 500, contributed the most this year, with 161 firms representing the sector. This pattern was not reflected in the top five, perhaps emphasizing the region's growing divergence. Semiconductors, Components and Electronics fell from first to second place this year, with 116 companies versus 160 in 2012. Internet came third, with 104 businesses versus last year's 85, and three of them in the top five.

UK Trade & Investment is the government department that helps UK-based companies succeed in the global economy. It also helps overseas companies bring their high-quality investment to the UK's dynamic economy, acknowledged as Europe's best place from which to succeed in global business. UK Trade & Investment offers expertise and contacts through its extensive network of specialists in the UK, and in British embassies and other diplomatic offices around the world. It provides companies with the tools they require to be competitive on the world stage.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee, and its network of member firms, each of which is a legally separate and independent entity. Please see www.deloitte.com/about for a detailed description of the legal structure of Deloitte Touche Tohmatsu Limited and its member firms.

Deloitte provides audit, tax, consulting, and financial advisory services to public and private clients spanning multiple industries. With a globally connected network of member firms in more than 150 countries, Deloitte brings world-class capabilities and high-quality service to clients, delivering the insights they need to address their most complex business challenges. Deloitte has in the region of 200,000 professionals, all committed to becoming the standard of excellence.

This communication contains general information only, and none of Deloitte Touche Tohmatsu Limited, its member firms, or their related entities (collectively, the 'Deloitte Network') is, by means of this communication, rendering professional advice or services. No entity in the Deloitte Network shall be responsible for any loss whatsoever sustained by any person who relies on this communication.
